The Cuts located NE of Anamoose.

Hunting & Fishing Opportunities

Lonetree Wildlife Refuge

Lonetree Wildlife Refuge is located south of Anamoose and offers 33,000 acres of wildlife habitat owned by the Bureau of Reclamation and managed by the North Dakota Game & Fish Department. This area offers some of the best hunting, birdwatching, hiking, mountain biking and horseback riding in the upper midwest with three of the Central Dakota birding trails in the Anamoose area. The refuge also hosts a portion of the North Country National Service Trail which, when complete, runs from New York to North Dakota and is 4,200 miles in length. Wildlife that can be viewed include whitetail deer, moose, sharptail grouse, ring-necked pheasant, Canada & snow geese, and piping plover, just to name a few.

White-tail deer and ring-necked pheasants are abundant in the area.
